WHAT is a PCN – Primary Care Network

- To meet local requirements, practices have begun working together and with community, mental health, social care, pharmacy, hospital and voluntary services in their local areas in primary care networks
- Members of a network can be anyone or service that can be of benefit to Patients and their families/Carers
- MHP will be working with other members to recruit more staff, such as pharmacists and social prescribers to help our patients access assistance

Social Prescribers

Social prescribing is designed to support people with a wide range of social, emotional or practical needs, and many schemes are focussed on improving mental health and physical well-being.

Those who could benefit from social prescribing schemes include people with mild or long-term mental health problems, vulnerable groups, people who are socially isolated, and those who frequently attend either primary or secondary health care.
